

About AW Engineering

CNC Machining and Custom Machined Components Providing:

- FREE Quotations
- FAST Turnaround
- FRIENDLY Service
- FOCUSED on Quality
- FIRST choice partner for all your machining and component requirements

At AW Engineering we pride ourselves on providing CNC machining and high quality custom machined components for all your machining requirements.

We provide a fast, friendly and flexible service to a wide range of customers in a variety of industries including the Automotive, Agricultural, Architectural, Medical, PPE, Leisure and Lighting industries with a great number of customer relationships being formed over many years.

Our continual investment in technology means we are capable of turning 2mm to 250mm on CNC fixed and sliding head twin spindle Mill/Turn Centres. We also have CNC vertical machining capacities up to 1060 x 600 x 600, all in house at our 8400sq.ft. Site in Surrey.

We also provide a wide range of treatments and finishes to your specification. Anodizing, Alocrome, Plating, Heat Treatment, Mechanical Testing and many more all supplied by our approved Sub Contractors
